

THRIVE
RENEWABLES

INVESTMENT FACTSHEET

Issue date April 2021

WHO WE ARE

Thrive Renewables plc provides investors with the opportunity to contribute directly to a cleaner, smarter energy system. We have over 25 years experience in financing, building and operating renewable energy projects. Thanks to our community of over 6,000 investors, our portfolio now consists of 19 wind, hydro-electricity and other clean energy projects. Collectively, our sites produce enough renewable electricity to power the equivalent of all the homes in a city the size of Worcester¹. We're absolutely focused on delivering new clean energy capacity that benefits the UK.

OVERVIEW

2019 turnover	£13.8 million
2019 operating profit	£4.1 million
Current portfolio	19 renewable energy projects
Assets under management	£93 million
2019 total renewable electricity capacity	54.5MW
Renewable capacity invested in - including projects sold or repaid	110MW
2019 final dividend	7p per share
2019 interim dividend	40p per share
Number of investors	6,096

LATEST UPDATE

Two new battery investments further diversify portfolio. In March 2021, we acquired the project rights to a 20MW battery project at Feeder Road in Bristol which is due to complete construction in 2022. The company's first battery investment at Wicken near Milton Keynes is expected to be operational in summer 2021.

Operating effectively during the Covid-19 pandemic: The safety of staff, contractors and the wider community is of paramount importance and we have adapted working practices in line with government guidance. Our wind farms and hydro projects form part of critical national infrastructure and are maintained and generating as usual. The pipeline of new renewable energy projects remains strong and we are operating business as normal.

Directors' Valuation: In response to the government announcement in March that Corporation Tax will rise to 25% in 2023, the Directors Valuation was revised to £2.15 per share.

INHERITANCE TAX AND SIPP

Inheritance Tax: Shareholdings in Thrive Renewables plc qualify for Business Property Relief (BPR) if held for more than two years. BPR provides relief from inheritance tax on the shareholder's death, placing BPR shareholdings outside of the shareholder's estate for inheritance tax purposes. This information is correct as at our publication date but please note that tax legislation is complex and can change so you should take your own tax advice.

Self-Invested Personal Pension (SIPP): It is possible to hold investments in Thrive Renewables plc through some full service Self-Invested Personal Pension, or SIPP, providers. For more information, talk to your SIPP provider or financial advisor if you have one. Or contact us for a list of SIPP providers who have told us they can accept investments in Thrive Renewables plc.

IMPORTANT NOTICE

Past performance is no indication of future performance. As with all investments, investing in Thrive bonds or shares comes with risk and investors should educate themselves before making a decision to invest. You should speak to an independent financial advisor if you need help making this assessment. The information contained in this fact sheet is correct to the best knowledge of the directors of the company, however any investment decision should not be made on this information alone. Further information about Thrive Renewables plc can be found at www.thriverenewables.co.uk.

Thrive Renewables plc is an unlisted company and shares in Thrive Renewables plc aren't traded on a recognised investment exchange such as the London Stock Exchange or the Alternative Investment Market. Buying and selling of shares is facilitated through a matched bargain market run monthly by an independent broker. This means share transactions can be infrequent and there is no guarantee that you will find a buyer for your shares nor what price they will be willing to pay.

The value of your investment and any income from it may fall and you may get back less than, or none of, the amount you invested. The Directors' Valuation will always be published on the Thrive Renewables website.

¹ Calculated using the most recent statistics from the Department of Business, Energy and Industrial Strategy (BEIS) showing that annual UK average domestic household consumption is 3,781kWh, www.renewableuk.com/page/UKWEExplained. Population of Worcester 103,769.

² Calculated using Thrive Renewables' own generation multiplied by the impact figures published at www.renewableuk.com/page/UKWEExplained (at the time of writing)

³ We could not find a nationally recognised means of calculating the water savings generated by generating using wind and solar. The power sector consumes over 40% of Europe's water, mainly for cooling purposes. We have identified that nuclear consumes approximately 2.7m³/MWh, gas plants 0.7m³/MWh and coal plants 1.9m³/MWh (<https://windeurope.org/fileadmin/files/library/publications/reports/>)

⁴ Average shareholding 4161 shares

⁵ Cumulative total to date.

⁶ Latest available figures.

⁷ Audited figures for 2019.

⁸ We operate a Buy Back policy for shareholders who have owned their shares for more than 24 months and made them available on our monthly share auctions for more than 12 months. We intend to buy back shares twice each year at a 10% discount to the Directors' Valuation, provided that the Buy Back Fund for the relevant year has not been exhausted and there are sufficient financial resources available. This service is operated at the discretion of the Thrive Renewables directors.

This financial promotion has been approved by Triodos Bank UK Limited, registered in England and Wales with no. 11379025. Registered Office: Deanery Road, Bristol BS1 5AS, United Kingdom.
